## PROFESSIONAL SUMMARY

---

Flutter Developer focused on end to end product development, sound architectural decisions, and delivering production ready mobile applications. Leverages AI assisted development to accelerate implementation, streamline workflows, and deliver features more efficiently while maintaining code quality and maintainability.

## EDUCATION

---

**Bachelor of Science in Computer Science (In Progress)**

Virtual University of Pakistan

**Intermediate in Computer Science**

Pakistan Shipowners Government College

**Matriculation in Science**

Shoeby Grammar Secondary School

## SKILLS

|                                 |                                                                         |
|---------------------------------|-------------------------------------------------------------------------|
| <b>Languages</b>                | Dart                                                                    |
| <b>Frameworks</b>               | Flutter                                                                 |
| <b>State Management</b>         | Bloc, Riverpod, GetX, Provider                                          |
| <b>Backend &amp; Database</b>   | Firebase (Auth, Firestore), Supabase                                    |
| <b>API Integration</b>          | REST APIs, JSON Parsing, WooCommerce API                                |
| <b>Release &amp; Deployment</b> | Google Play Console, App Store Connect                                  |
| <b>Tools &amp; AI</b>           | Git, GitHub, Android Studio, VS Code, Claude Code, Antigravity, Copilot |

## EXPERIENCE

---

**Flutter Developer**

2026 – Present

Alisons Technology

*Karachi, Pakistan*

- Develop and maintain production Flutter applications, including feature implementation, API integration, and app releases on Google Play Store and Apple App Store.
- Structure features using Bloc and GetX, maintaining separation between UI, business logic and data layers.
- Integrate REST APIs and implement push notifications to support backend driven data flows and timely user updates.
- Collaborate with UI/UX designers to refine designs, address usability gaps, and translate design feedback into polished interfaces.
- Troubleshoot production issues, implement fixes, and maintain application stability across releases.

## PROJECTS

---

**Smart Essentials** | Flutter, REST API, FCM

A Flutter based delivery app for Android and iOS that enables users to browse products, place orders, manage personal information and addresses, and track deliveries in real time, with Firebase push notifications and GetX state management.

**Smart Essentials Driver** | Flutter, REST API, FCM

A Flutter based driver app for managing deliveries, tracking cash collections, viewing payment history and monthly statements, accessing order receipts, and communicating with customer support through complaint chat.

**Private Organization App** | Flutter, REST API, Firebase Crashlytics

A Flutter based asset tracking app featuring QR/barcode scanning, offline data handling, GPS location capture, encrypted photo documentation, and synchronization.

**Patient Inform** | Flutter, Firebase

A Flutter and Firebase healthcare app that helps patients manage medications and surgical history, follow stage by stage care guides for hospital procedures, and access health tips, FAQs, and hospital ratings.
